

# Lego Brick

## Create and Write

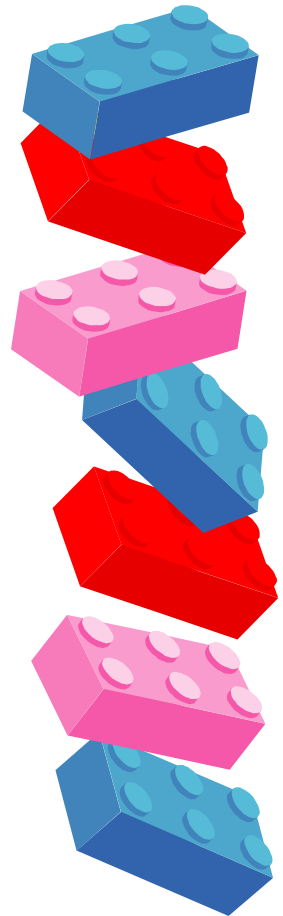

### Directions:

- Ask the child to build a creation out of lego bricks.
- Once the creation has been built, print off one of the Lego Brick Creation graphic organizers (pp. 3-6 of download) for the child.
- Ask the child to brainstorm descriptions about his creation and write them on the organizer (see example pg. 2)
- The child can then either draw a picture of his creation and write about it on the writing paper provided (pg. 7 & 8) or she can take a picture of her creation, print it off and do some descriptive writing about it.

### Variations:

- Use with a group of kids. Students build their own creations (without others seeing it). They each use the organizer to write descriptive phrases about their creations and the paper to write a descriptive riddle. All creations are displayed and as each child reads his riddle, the group guesses which creation is his.
- If you are able, the creation building and writing could be done before children meet together. Each child reads his writing aloud and guessing occurs at the meeting.

Example

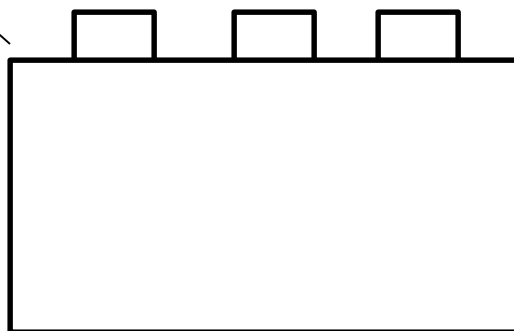

rocket blasters  
that shoot fire

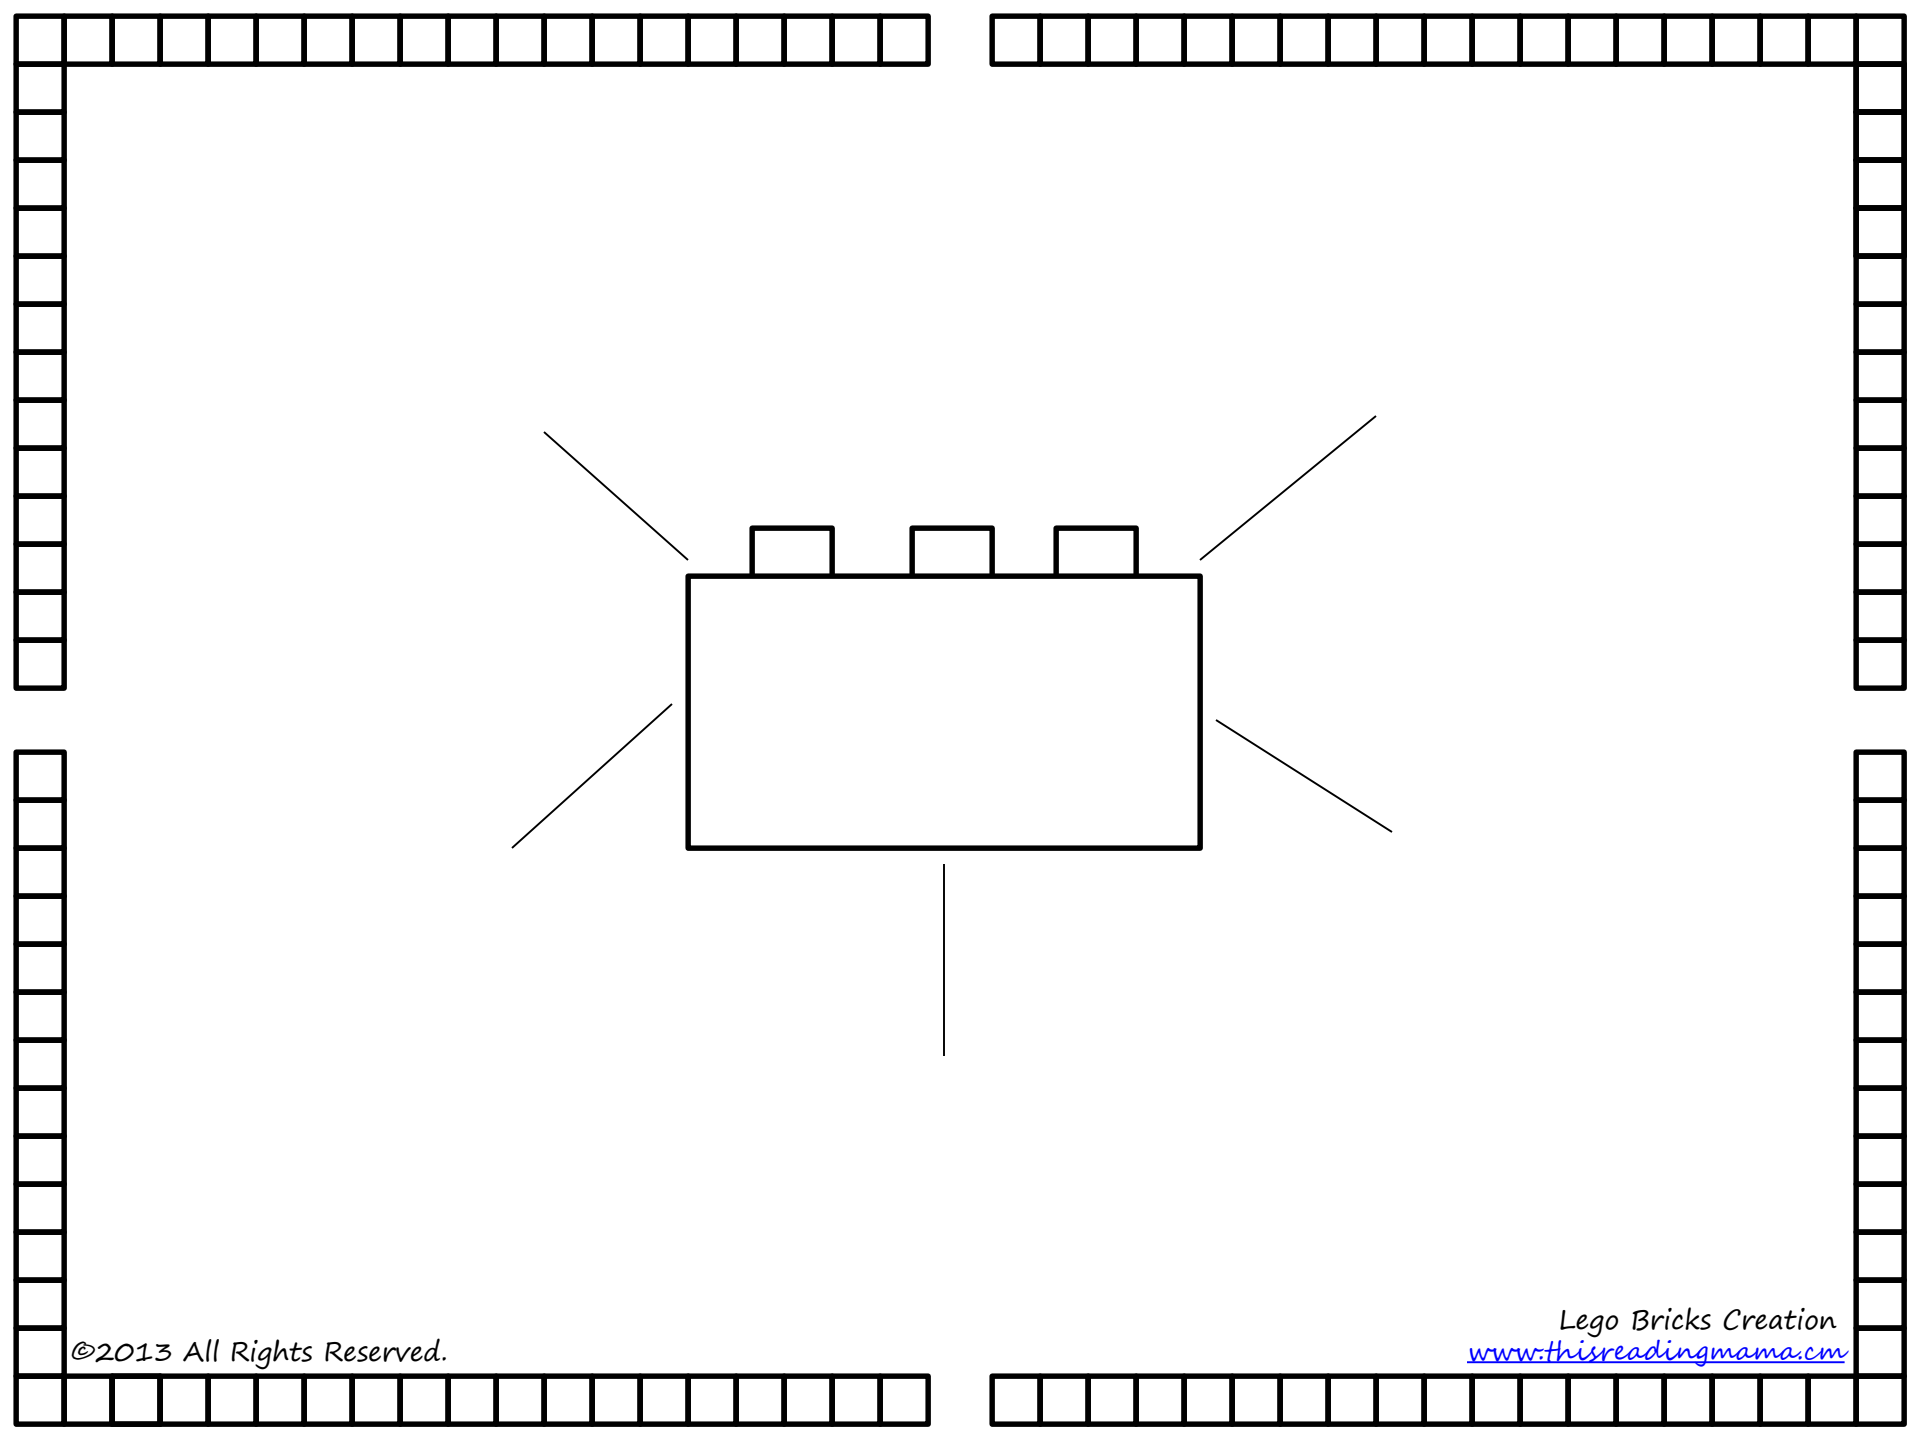

has a space man

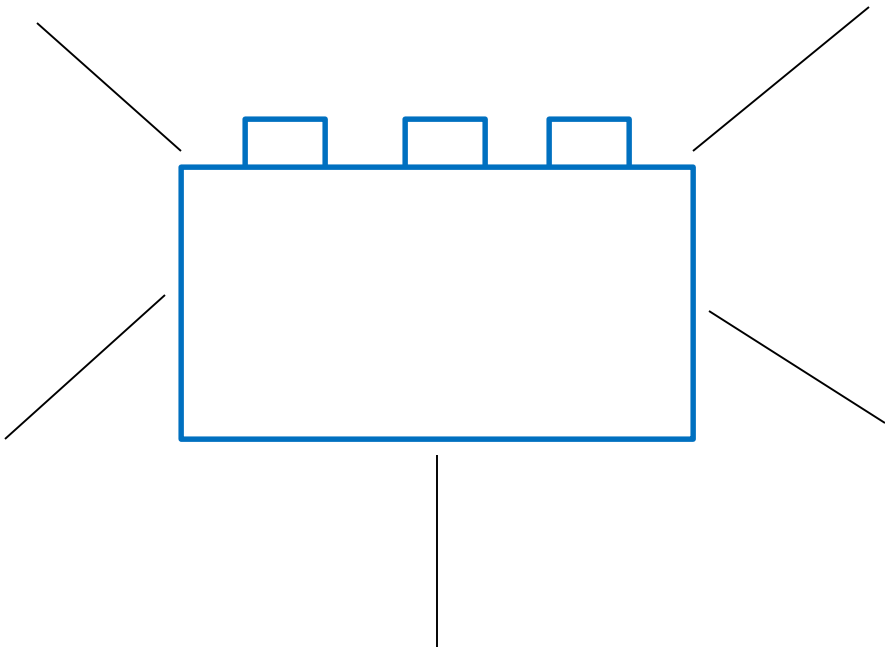

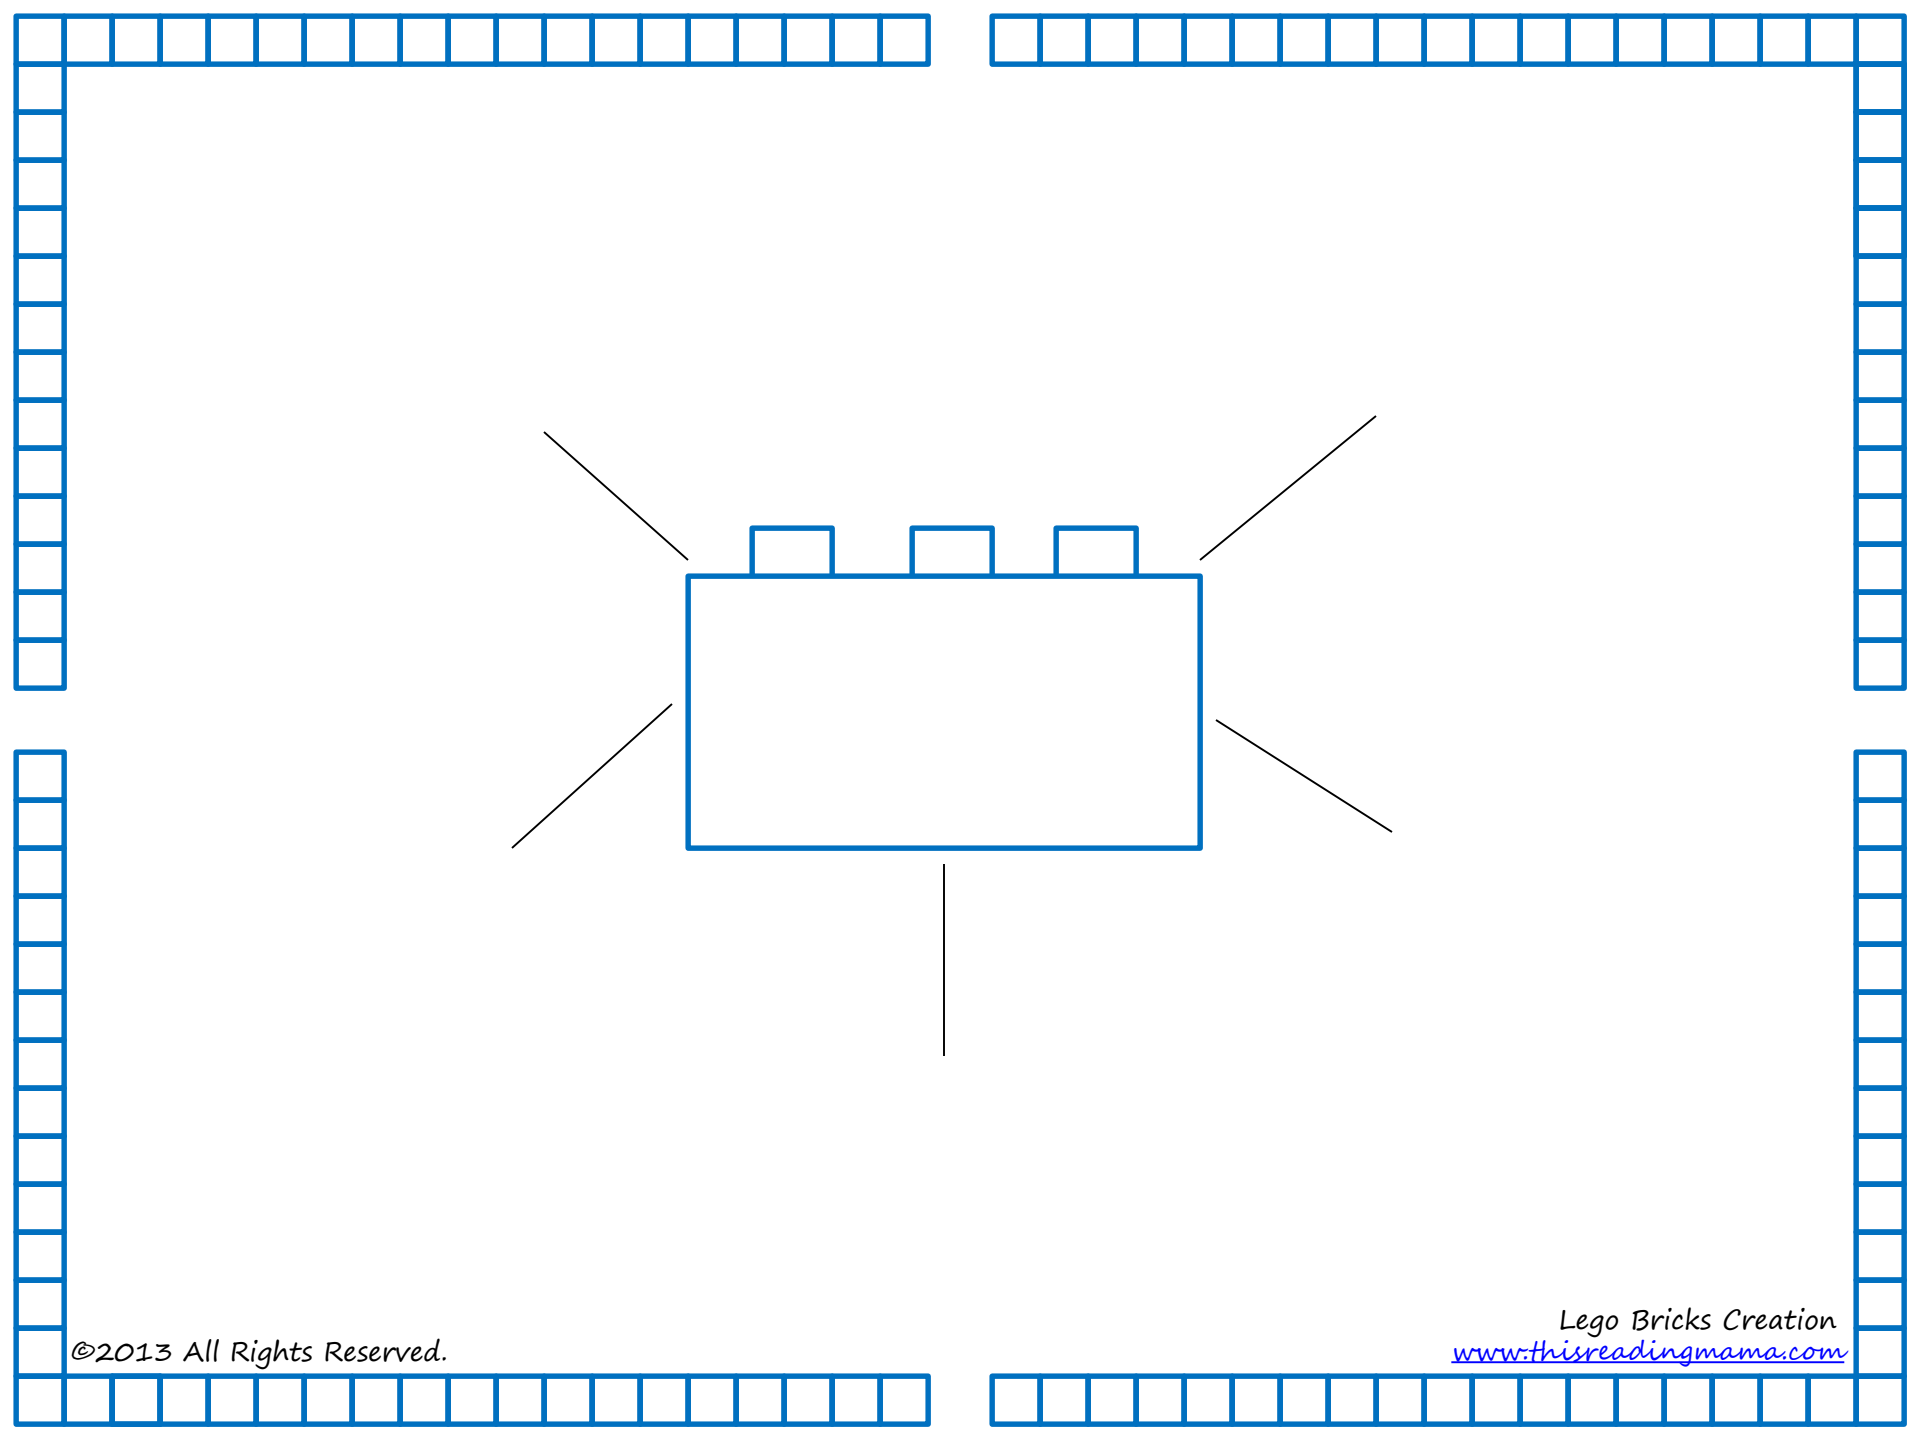

huge door for  
loading stuff

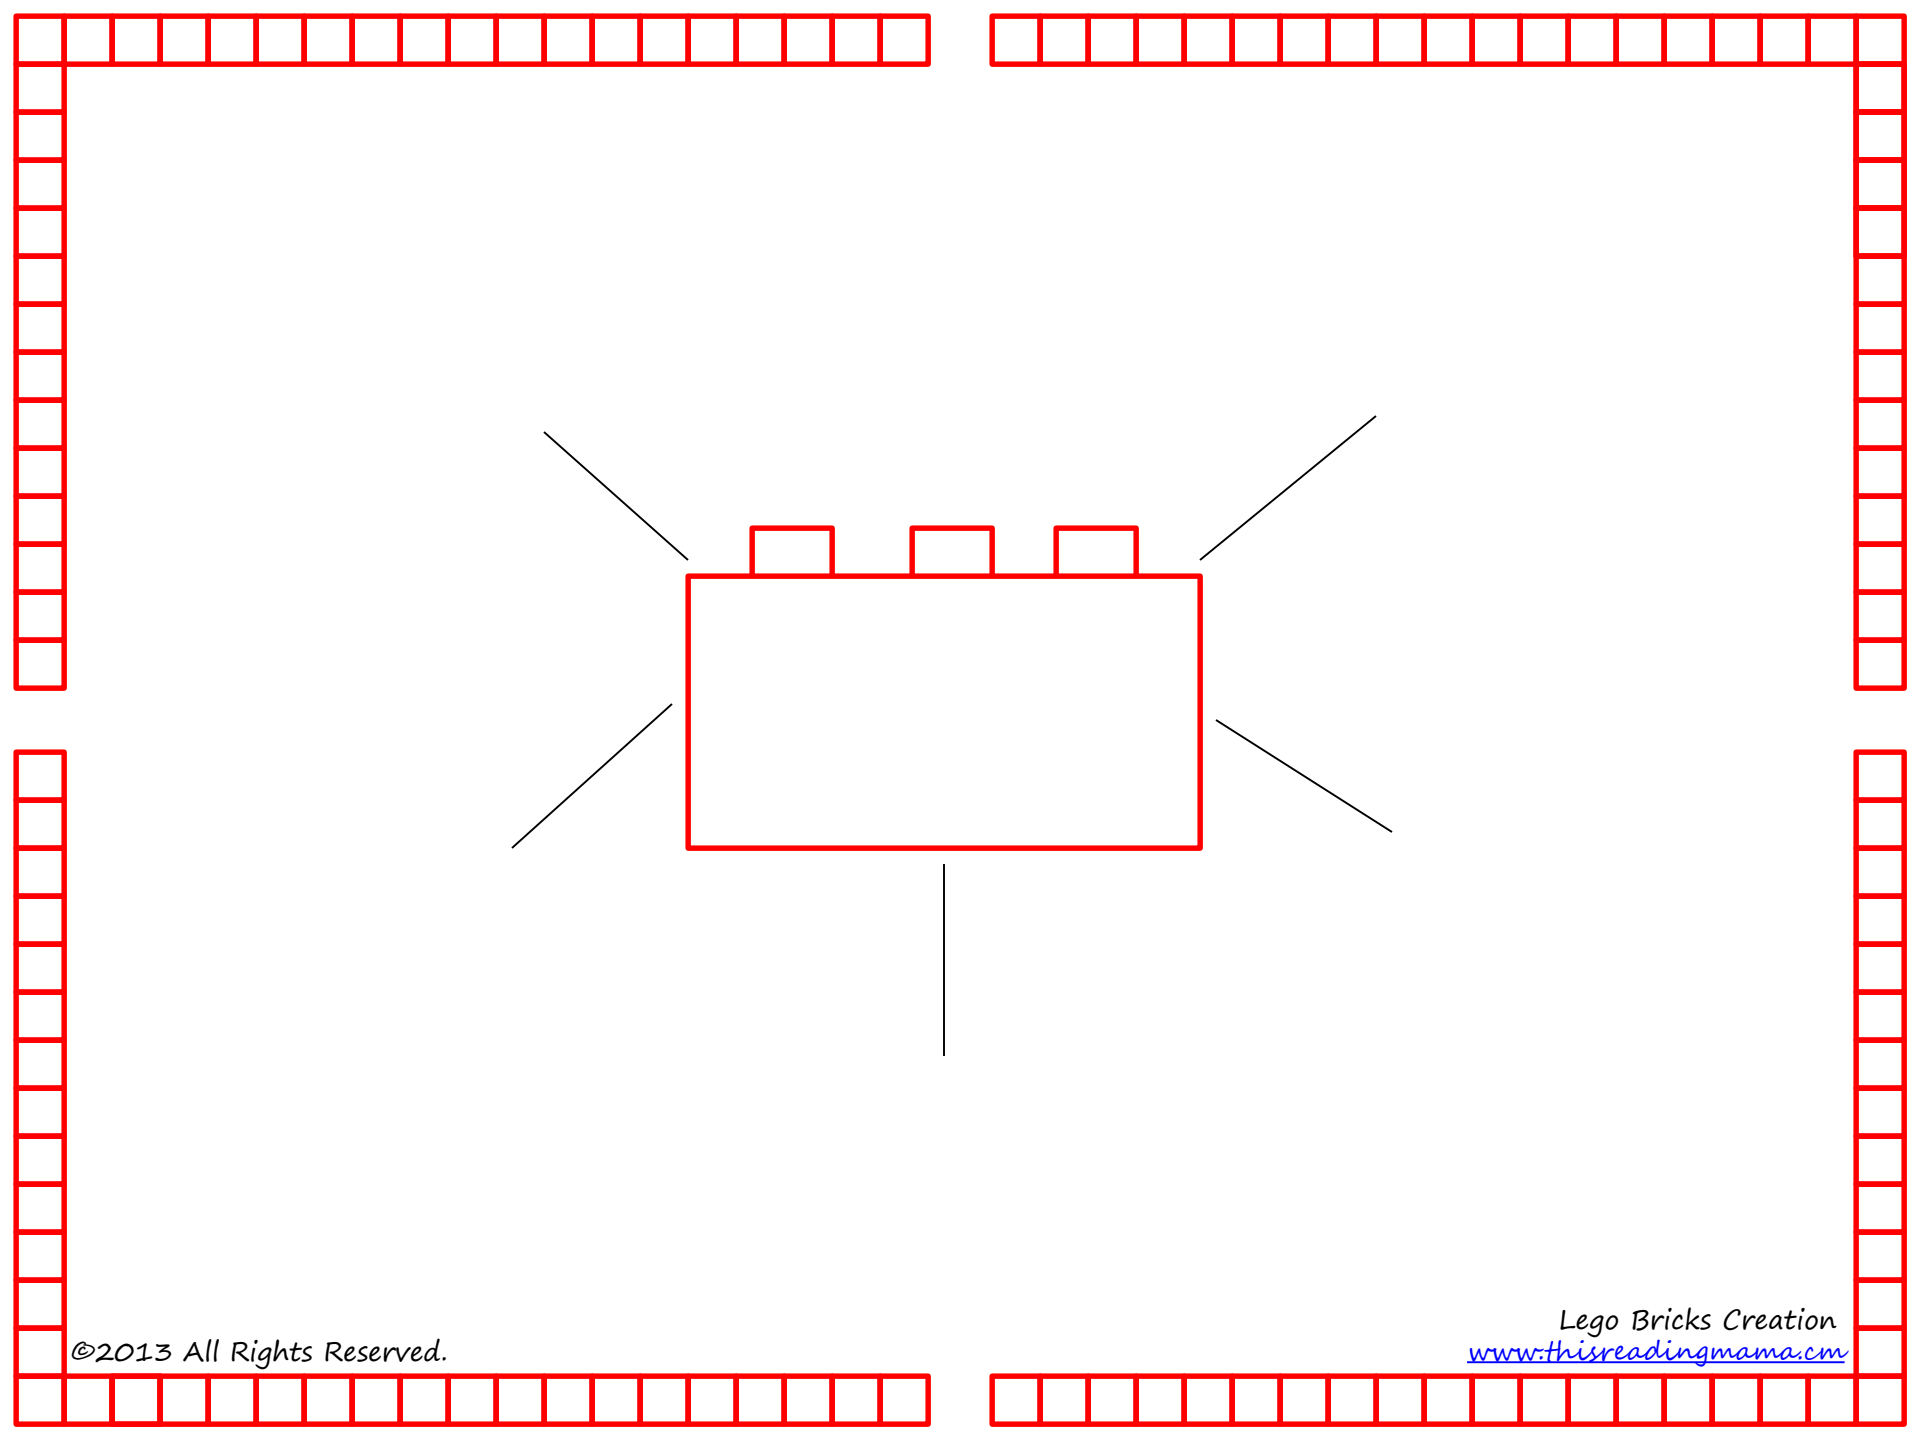

gray satellite

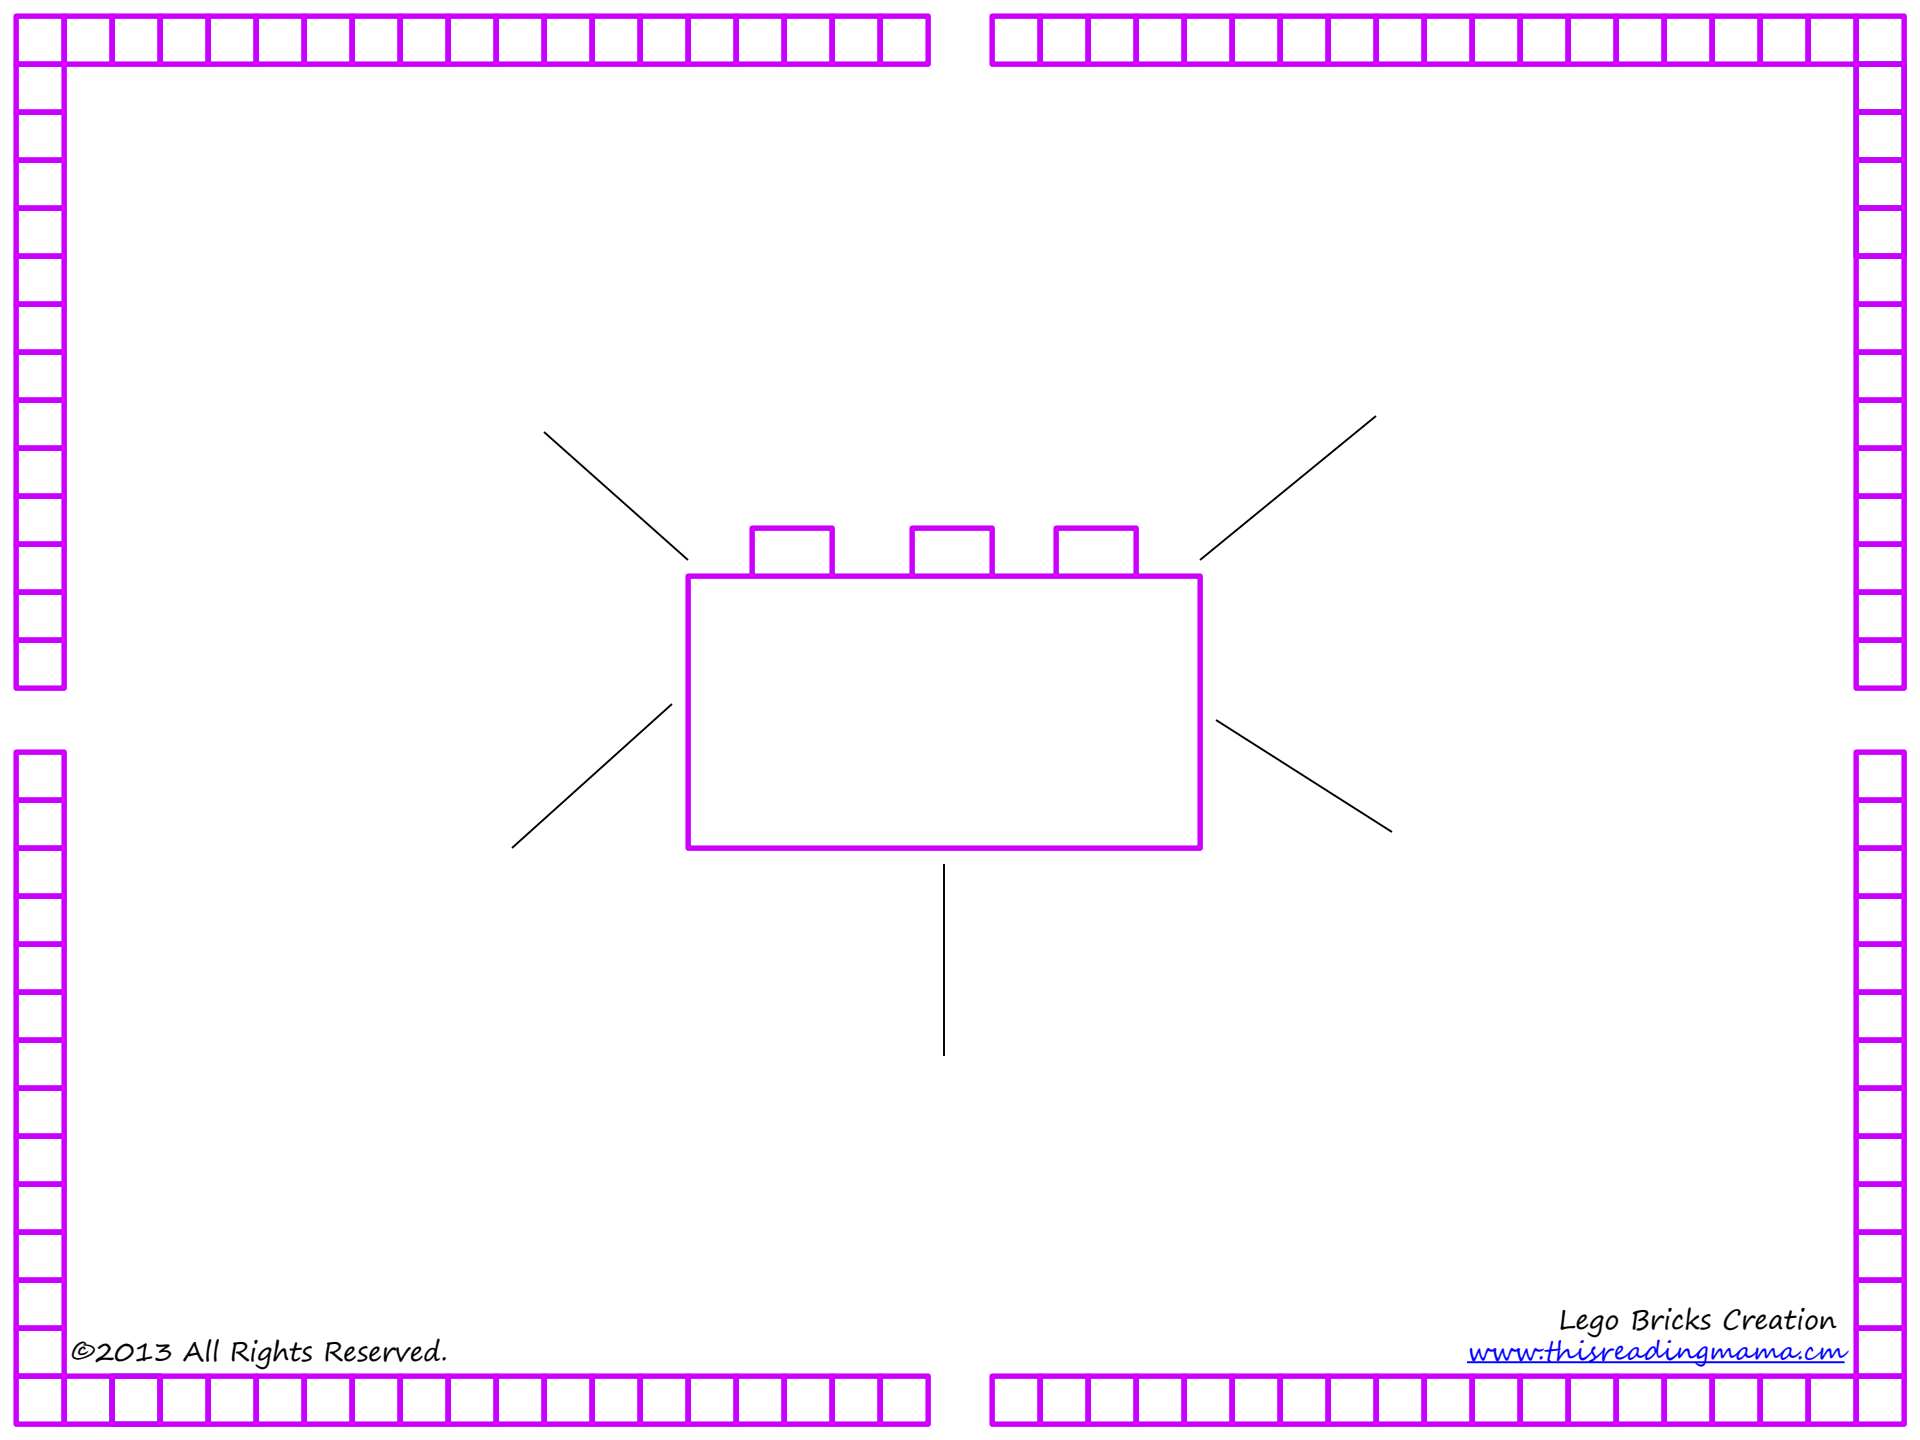

lots of landing gear

Handwriting practice lines consisting of multiple sets of solid top and bottom lines with a dashed middle line.
