

Clock Playdough Mats

Print off these open-ended clock mats (any color or black and white) to work on reading an analogue clock.

You will need:

- A clock playdough mat
- Plastic sleeve protector
- 2 colors of playdough (rolled into "snakes" of two lengths) – one for the hour hand and one for the minute hand
- A dry erase marker (for writing the digital time)

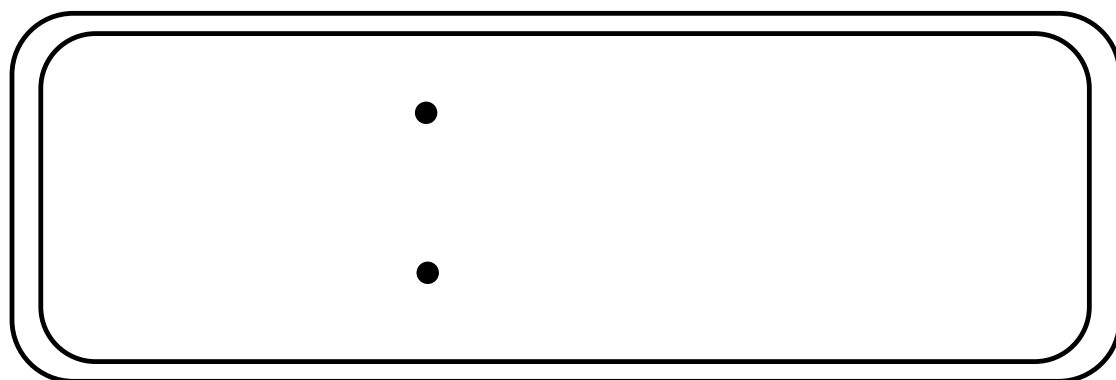

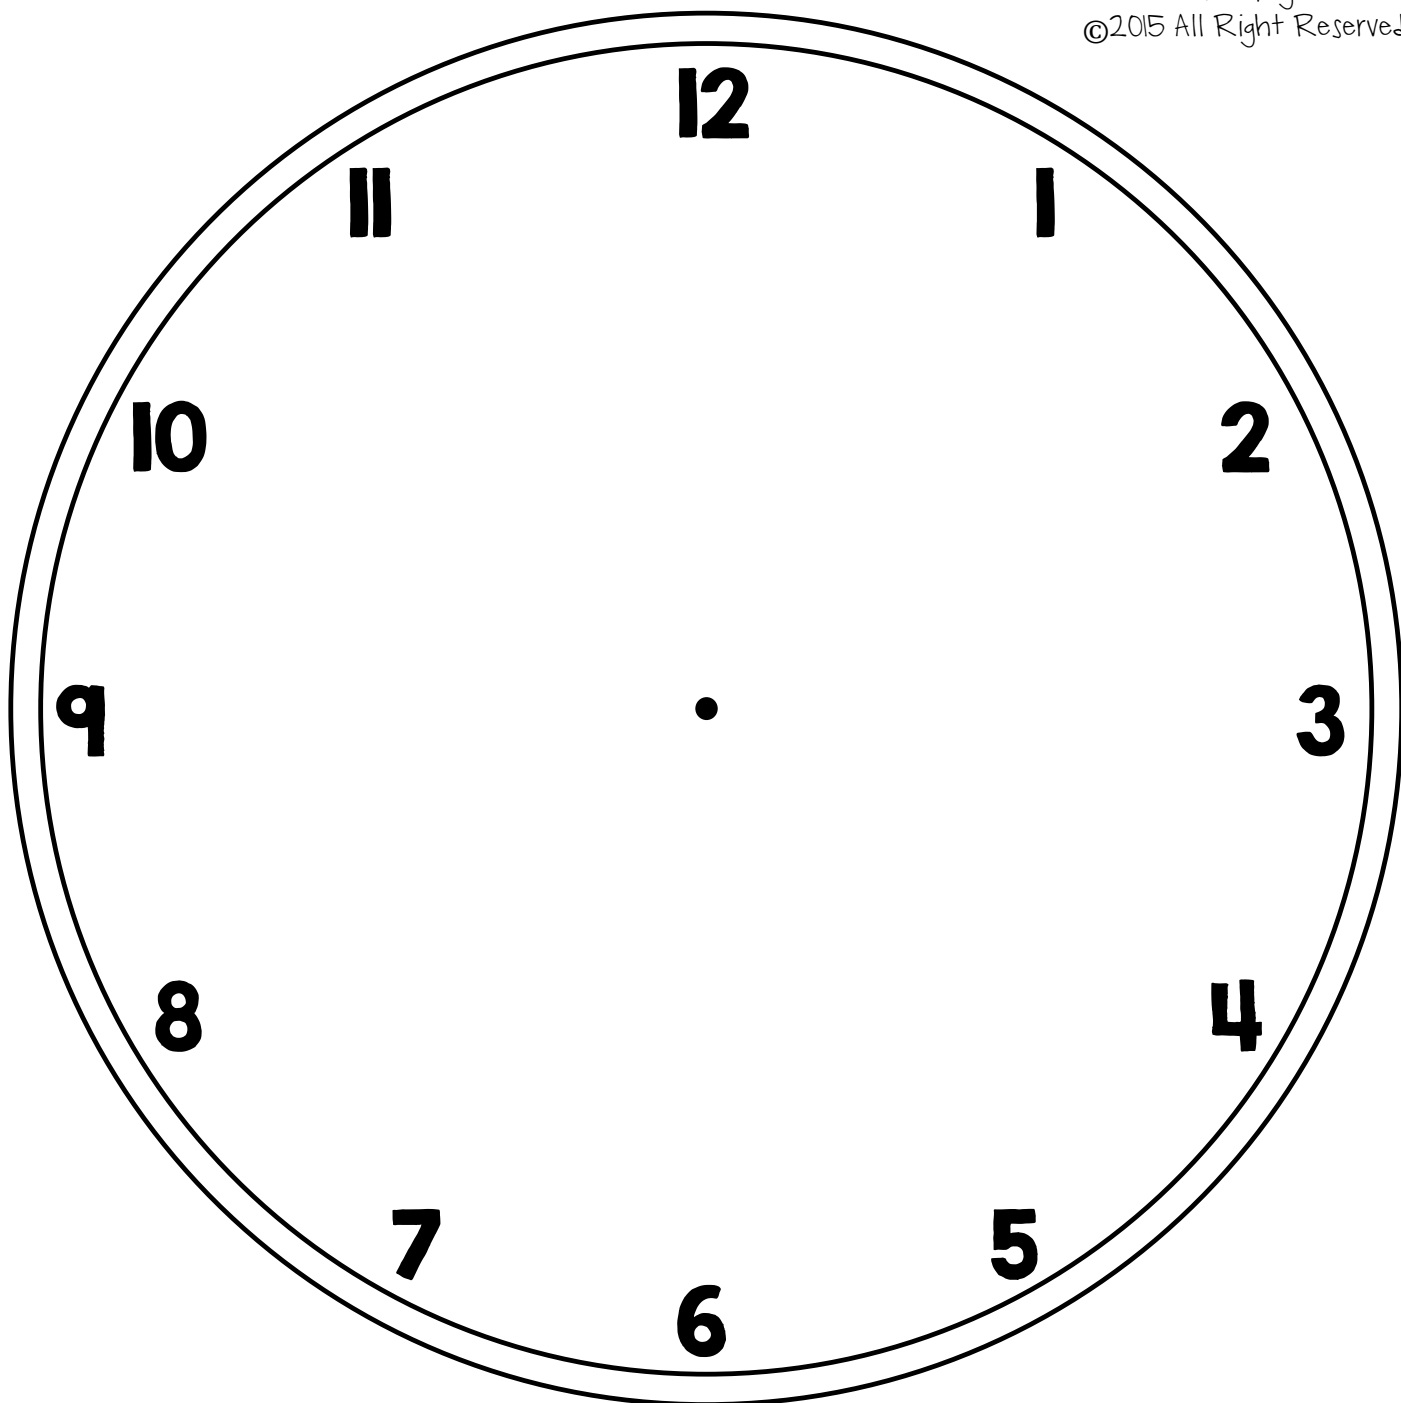

How to Play:

- Ask the child to put the hour hand in one position on the clock and the minute hand in another position. Ask the child to read the analogue clock and write the time on the digital clock.
- Ask the child to write a time on the digital clock and then use the playdough hands to make that time on the analogue clock.
- Create other fun ways to use this, like "Show what time you eat lunch." or "Show me what time you wake up."
