These color by color words pages are perfect for kids who need to learn their color words or practice reading color words.

There are two levels included in the pack:
Level 1 includes the color words in their color to aid kids as they color. If your younger preschooler or tot likes to color, these are great for him.
Level 2 has the color words in black and white, which is a great way to review reading and recognizing color words. As a resource, a simple color chart has been included on pg. 14. Level 2 is a great fit for older preschoolers or Kindergartners.
